RE. European patent application  
Application No. 14163123.4 filed on April 2, 2014  
In the name of OFFICINA BOCEDI S.R.L.

This is a reply to the Communication pursuant to Article 94(3) EPC issued on July 09, 2015 with reference to the above-identified European Patent Application.

In order to rectify deficiencies as the Examiner complained in the Communication pursuant Article 94(3) EPC, were carefully taken into account the following argumentations and one amendment related to the figures.

## AMENDMENTS

Claim 1 has been further amended by introducing the subject matter taken from the description filed on March 16, 2015 at page 6, lines 9-18, referring to:

*"...the vertical movement of the cutting and welding device (4) is obtained using the positioning device (5), which is provided with the vertical sliding means as a conveying system, the cutting and welding device (4) in vertical mobile along the frame (2) and is arranged resting on the positioning device (5) underneath, so as be moved vertically and integrally with the positioning device (5) ..." and "...blocking means being provided to maintain the cutting and welding device (4) fixed in a specific vertical position with respect to the frame (2), during normal functioning of the machine."*

A Working Copy of the Claims 1-6 is enclosed for a better understanding of the amendments in which the amendments have been highlighted with respect to the application as filed in order to better understand the compliance with art. 123(2) EPC. Indeed, no new matter has been added according to Article 123(2) EPC because the above amendments are related to the same embodiment of the machine for packaging pallet as described in the description of the present application (see pages 6 and 7 of the description).
