

CLAIMS – SEVENTH AUXILIARY REQUEST

1. A mouthpiece (202) for an apparatus (100) for generating an inhalable medium, the mouthpiece (202) defining an aperture extending from a first opening (224) at a first
5 end (202a) of the mouthpiece to a second opening (226) at an opposing end (202b) of the mouthpiece, the mouthpiece (202) being arranged to receive in the aperture through the first opening (224) a flavour element (234) for imparting a flavour to a flow of at least one of a vapour and an aerosol that passes through the mouthpiece (202) in use, the aperture having a first radial dimension (d1) towards the first opening (224), and a
10 second radial dimension (d2) towards the second opening (226), wherein the second radial dimension (d2) is smaller than the first radial dimension (d1); and the mouthpiece (202) further comprising the flavour element (234) received in the aperture through the first opening (224), wherein the flavour element (234) comprises pelletised tobacco.

15

2. The mouthpiece (202) of claim 1, wherein the second radial dimension (d2) is arranged to prevent said flavour element (234) received in the aperture through the first opening in use from passing through to the second opening.

20 3. The mouthpiece (202) of claim 1 or claim 2, wherein the aperture is or comprises a stepped bore (230), the stepped bore comprising a first bore portion having the first radial dimension (d1) and a second bore (232) portion having the second radial dimension (d2).

25 4. The mouthpiece (202) of claim 3, wherein a step of the stepped bore is arranged to prevent said flavour element from passing to the second opening (226).

5. The mouthpiece (202) of claim 3 or claim 4, wherein at least a portion of the stepped bore (230, 232) towards the first opening is cylindrical.
