[CLAIMS]

[Claim 1]

A hygienic thin-leaf paper comprising:

5 a first sheet including one or more first embossed regions in each of which one or more first embossed protrusions and one or more first non-embossed protrusions are included, the first sheet including one or more first non-embossed regions in each of which a first embossed protrusion and a first non-embossed protrusion are not  
10 included;

a second sheet including one or more second embossed regions in each of which one or more second embossed protrusions and one or more second non-embossed protrusions are included, the second sheet including one or more second  
15 non-embossed regions in each of which a second embossed protrusion and a second non-embossed protrusion are not included,

wherein the first sheet and the second sheet are integrally laminated,

20 wherein the first embossed protrusions include multiple first dotted embossed protrusions and multiple first linear embossed protrusions,

wherein the second embossed protrusions include multiple second dotted embossed protrusions and multiple  
25 second linear embossed protrusions,

wherein each first non-embossed region faces a given second linear embossed protrusion, ~~and~~

wherein each second non-embossed region faces a given first linear embossed protrusion,

30 wherein either or both of the first linear embossed protrusions and the second linear embossed protrusions include two intersecting linear embossed protrusions,

wherein each first linear embossed protrusion on a first sheet side has an intersection and each second linear embossed protrusion on a second sheet side has an  
35 intersection,
