

Auxiliary request 15

1. An air cleaner assembly (500) comprising:
  - (a) an openable cleaner housing (501) defining an interior; and
  - (b) an air filter cartridge (502) removably installed in the air cleaner assembly;
  - (c) the air cleaner assembly including a security, housing closure, inhibition arrangement configured with a first member (570x, 570) on the air cleaner housing (501) and a second member (575) on the air filter cartridge (502);
    - (i) the security, housing closure, inhibition arrangement being such that:
      - (A) if an alternate cartridge does not have the second member (575), but the cartridge is otherwise configured to at least appear from outward appearance to properly fit the housing (501), the first member (570x, 570) will prevent the housing (501) from closing with that alternate cartridge installed; and
      - (B) the first member (570x, 570) and the second member (575), of the security, housing closure, inhibition arrangement will interact to allow housing (501) closure, when the cartridge (502) is properly installed, the air filter cartridge (502) comprising:
        - (a) a media pack (516) having an outer perimeter and opposite flow faces (516i, 516o); and
        - (b) a housing engagement member (517) surrounding the media pack (516); the housing engagement member (517) including a seal arrangement having: a pinch seal portion (560); and, a seal support portion (565) the pinch seal portion (560) having opposite
