Anmelde-Nr:
Application No: 18 750 027.7
Demande n°:

Claims 2 and 3 have been taken up into claim 1. However the claims cannot serve as a basis for that amendment as the combination of the features of claims 2 and 3 with the features of the remaining claims has no basis in the application as filed due to the missing interdependencies as filed. As basis for this amendment the applicant cites [43], which basically is referring to the mode of action of the structurants, which should thicken and at the same time maintain the composition in an homogeneous state. It is noted that neither a homogenous state nor a minimized phase separation is part of the claims. There is no context between the amendments and the passage cited. Consequently the applicant has not provided the basis satisfactorily.

nota bene: The amendment appears also not suitable to remedy the deficiencies.
